QUICK GUIDE

- Programming: **Java** (DSA), **C** (Basic), **Python** (ML), **MySQL**, **JavaScript**
- Web Development: **HTML, CSS, JavaScript** and **MongoDB**
- Machine Learning: Applied **ML** techniques, dataset analysis, and algorithm implementation.
- Computer Fundamentals: **DBMS, OS, SQL** and **Computer Networks**.
- Current Internship: **IBM** virtual internship on Machine Learning for **2** months. Tech advanced **NLP** and data analysis.

EDUCATION

- **University of Petroleum and Energy Studies** — ***2022 – Present***
  B. Tech in Computer Science — CGPA: **8.44 (Current)**
- **Central Board of Secondary Education** — ***2021***
  Senior Secondary — Percentage: **85.8%**
- **Rajasthan State Board** — ***2019***
  Secondary Education — Percentage: **87%**

PROJECTS

AI Clinical Trial Matching System — Link >

- An intelligent web app that matches individual patients to clinical trials using both **rule-based** criteria and **semantic** similarity of unstructured medical text.
- Combining advanced **NLP, ChromaDB**-powered vector search, and a **Streamlit** interface, it delivers real-time, explainable results with professional analytics and PDF reports.

DSA based Projects

- **N Queens Visualizer** using **Backtracking** — Link >
- **Binary tree Visualizer** — Link >

Machine Learning Models — Link >

Tools: Google Colab, VS Code, Kaggle

- **Conducted drug discovery research using the ChEMBL database. Conducted** data cleaning by handling missing values, outliers, and feature engineering.
- Developed a **WhatsApp Chat Analyzer** as a **Streamlit** app to analyze chat data. — Link >
- Developed a **CNN for Classifying Traffic Signs**.
- Performed **Market Basket Analysis** using **Association Rule Mining** and the **Apriori** Algorithm.
- Implemented a **particle identifier** (hedron or gamma) using **KNN**, **Naive Bayes**, **Logistic Regression**, and **SVM**, with performance comparison across methods.

ACTIVITIES

- Solved **200+** DSA problems on LeetCode and GeeksForGeeks.
- Developed a **laxer** and **parser** on C as my minor project.

CERTIFICATIONS

Web Development Internship

CodSoft | Virtual

- Web development experience with front-end and back-end technologies.

Career Essentials in Generative AI

LinkedIn- learning | Microsoft

- Covered AI fundamentals and Generative AI applications.

Data Visualization Using Python

Great Learning

- Used Matplotlib, Seaborn, and Pandas for data visualization.

Certificate of Participation

ICMLDE 2024 | UPES

- Workshop on AI, Quantum Computing, and Autonomous Vehicles.
